

SYSTEM STAGING

MODULAR METRIC STAGING SYSTEM

Publicity systems has developed a modular stage system for use with conference, exhibitions and other presentation needs.

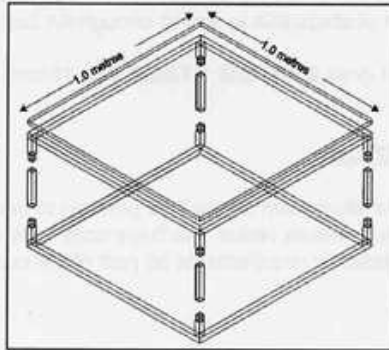

The staging - known as **SYSTEM STAGE** - is incremental in height up to a maximum height of 1 metre.

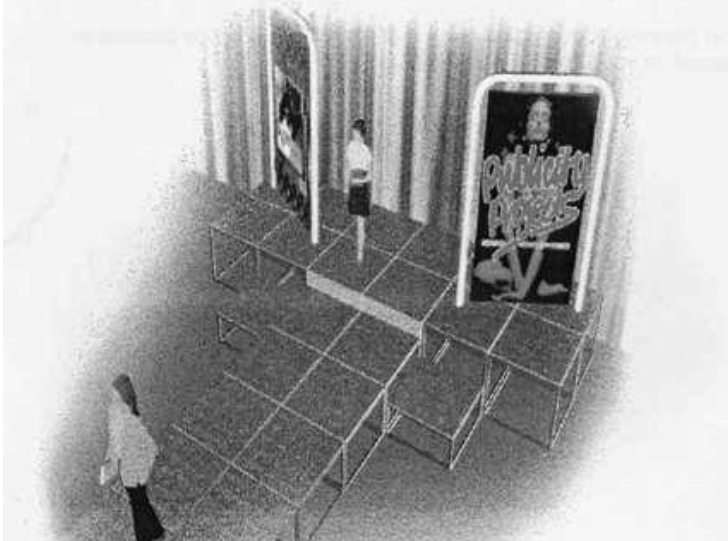

exhibitions · spaceframe · shell scheme

Standard heights are:-

200mm	(8 inches)
400mm	(1ft. 4 inches)
600mm	(2ft)
800mm	(2ft. 8 inches)
1 metre	(3ft. 4 inches)

The decking is 18mm flooring grade chipboard and side skirts are either white faced hardboard or Brocord flameproof material.

SYSTEM STAGE

Lightweight modular staging is one of the most essential tools of the exhibition and conference industry. Traditionally, staging has been wood-based and folding, taking up a great deal of space and weight in transportation. It also usually demands to people to assemble and install.

SYSTEM STAGE is our answer to this problem. Constructed on a one metre modular basis, it fits in with 90% of exhibition and conference requirements and interlocks well with most existing standard metric systems - such as 'Octanorm', 'Mero' and 'Structura'.

Made from welded steel construction and finished in Hammerite paint, the staging is both hardwearing and can be used either covered or exposed. It is clipped together with it's own spring clip system and forms a solid block of stage that is strong enough for both people and equipment.

For extra heavy equipment, we can deck **SYSTEM STAGE** with 25mm. decking and both steps or ramps are available as required.

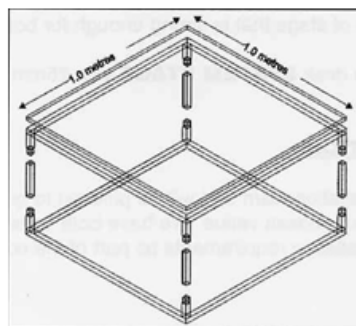

TRANSPORT AND INSTALLATION

We have our own delivery and installation team and will be pleased to quote you a price for both transportation and installation at your chosen venue. We have both vans and trailer for delivery and can discuss your transport and installation requirements as part of the contract.

PRICING

While it difficult to provide a very accurate 'rule of thumb' estimate without knowing your detailed requirements, currently for a three to four day event, the total for **SYSTEM STAGE** is likely to be in the region of £10 to £15 per metre. Venue location and time available for installation will affect the final price and price per staging unit is on a sliding scale - the larger the stage area, the less per unit.

We hope the above is of help in planning your staging requirements and we shall be pleased to provide you with a full quote based on your exact specification.
